

## LabWork - 4

- You are given two files “film.c” and “data.txt”.
- Make sure that “film.c” and “data.txt” are in the same folder.
- Compile, run and examine “film.c” source file.
- You are expected to implement the functions: list, find, update, and sort.
- The scope of these functions is up to your imagination and talent.
- The assessment will be made with respect to the quality of your function implementation.
