

COMP 1123

Assignment 5

Yaşar University

May 31, 2021

Assignment

- Implement all the functions of the linked list in the “week13” folder.
- Follow the function signatures without changing anything.
- Handle the errors by returning error codes.
- Design the linked list as non-nullable.
- For linked list, write a function that sorts using selection sort.
- Create a linked list with 10 random and shuffled values in the main function. Sort this linked list by using the function that sorts using selection sort, then print the linked list on the screen.
